

# General planning notes for the new Power Maths Y1–6 White Rose Maths editions

In the yearly sections below for Y1–6, you will find the following information to support your planning in advance of the Autumn term:

- ⚡ yearly overviews
- ⚡ major differences versus the first edition progression
- ⚡ resources to have ready
- ⚡ progression charts showing the list of lessons for all 3 terms are provided as separate documents ('Power Maths White Rose edition progression KS1/LKS2/UKS2')

There are some general differences to be aware of when planning to use the new edition:

- ⚡ In the 'Discover' section there is now more of a progression from 1A to 1B. Whereas before, 1B was mainly designed as a separate question, now 1A leads directly into 1B. This means that there is an improved whole-class flow, and also an opportunity to focus on the logic and skills in more detail. As a teacher, you will be using 1A to lead the class into the thinking, then 1B to mould that thinking into the core new learning of the lesson.
- ⚡ The 'Share' section, on the whole, has been clarified and the pages have been simplified for KS1 in particular. The number of models and representations has been reduced, to support the clarity of thinking prompted by the flow from 1A into 1B.
- ⚡ For KS1 especially, but also where needed in KS2, the Practice Book pages have been made more accessible for independent working as much as possible (see the blog [Using Power Maths flexibly in KS1](#) for guidance around independent work in Y1 and Y2).

NB: Teachers can choose the pace to work through the content, rather than just moving onto the next lesson/unit immediately. The plans below show the order and quantity of content for each year, but teachers can use the slack in the plan and give more time to units as they see fit.
